in-wall design speakers

| **basalte**

# | Beautiful design

**Plano is a unique collection of high-performance in-wall speakers for the world's most exclusive homes.**

In a stereo or in a surround setup, Plano will live up to the expectation to create a magical sound performance while blending into the interior design.

While Plano R3 is a compact and accurate in-wall speaker for smaller rooms or as a surround speaker, the bigger Plano R5 is our reference design and your perfect fit as a front stereo or center speaker.

brushed brass

High quality materials and hand-picked fabrics set a new standard in speaker finishing and allow for an aesthetic integration with Basalte's exclusive line of keypads and control panels.

Brushed aluminium, lacquered white, bronze, nickel and brass finishes combined with an exclusive palette of top-quality fabrics by Gabriel and Kvadrat from Denmark give you plenty of choice to find the perfect combination that fits your interior.

# | Impeccable **sound**

Although being understated and minimalistic, Plano speakers use the latest state-of-the-art technology to create an impeccable sound performance.

The powerful 6,5" aluminium mid-woofers are equipped with an aluminium phase plug for extended high frequency response and linearity.

While the 1" high resolution AMT ribbon tweeter combines wide dispersion and a crystal-clear response, the tiltable and rotational suspension creates extra directivity.

Plano R5 is equipped with additional double 6.5" Kevlar bass woofers for that extra oomph.

The EQ adjustment allows to fine-tune both high and low frequency responses to custom tailor the sound.

The installer friendly fast-lock mounting allows for a super easy installation.
