ZenVoice

¡Alexa! Thank Zennio for making my life easier

ZenVoice allows control of your KNX installation using voice assistants. No additional element is required other than the control touch panel.

What's needed?

1. Zennio Remote account (smartphone remote control).
2. Having a voice assistant, Alexa or Google Home, in your smartphone or Smart speaker.
3. Amazon Alexa/Google Home account.
4. Link your Amazon Alexa/Google Home account to your Zennio Remote account.

That's all!

The remote controls available in your app are now ready to be controlled using voice commands.
